

Regular Monthly Meeting Starring Caladiums

February 22, 2021

Port St. Lucie Botanical Gardens

Port St. Lucie, FL

Beautify Any Setting

Around trees, as garden borders, in pots or containers...caladiums will provide easy color and contrast for your every need!

Heather Furnari, our 1st Vice President, gave us info on planting and care of Caladiums and made us this beautiful dish garden as an example of what we are each doing & will bring in for our May meeting for “Show & Tell”. On February 1st, Heather and Darlene Enzian took a trip to Lake Placid, FL and purchased assorted Caladium bulbs from Happiness Farms. These bulbs were distributed to each person at our meeting. Over 90% of Caladiums sold in the U. S. come from Lake Placid.
